

CVS Repository

This is a WWW interface for CVS Repositories. You can browse the file hierarchy by picking directories (which have slashes after them, *e.g.*, **src/**). If you pick a file, you will see the revision history for that file. Selecting a revision number will download that revision of the file. There is a link at each revision to display diffs between that revision and the previous one, and a form at the bottom of the page that allows you to display diffs between arbitrary revisions.

This script has been written by Bill Fenner <fenner@freebsd.org> and improved by Henner Zeller <zeller@think.de>, Henrik Nordström <hno@hem.passagen.se>, and Ken Coar <Ken.Coar@Golux.Com>; it is covered by the [BSD-Licence](#).
