Department of Electrical Engineering and Computer Science**

6.035, Fall 2000

Handout 2 – Group Information

Wednesday, September 6

**THIS MUST BE RETURNED BY NOON ON MONDAY, SEPTEMBER 11th
(PLEASE SUBMIT ONE SHEET PER GROUP)**

Remember, each group may have either 3 or 4 members – no more, no fewer. If you have not found a group to work with, please send mail to 6.035-staff@mit.edu by this Friday (September 8th).

Group assignments will be posted on the web before the end of Monday, September 11th.

Please give us the following information for each member of your group:

Name	Address	E-mail	Phone	Proficient in Java?

The project will be implemented in Java. The optional text by Appel includes fragments of Java that are relevant to the first three project assignments. If you are not proficient in Java, we recommend that you have a copy of a reference book on Java programming handy when working on your 6.035 project, e.g., *The Java Language Specification* by Gosling, Joy, and Steele.

Which project does your group intend to complete? You should consider this a permanent decision. We estimate the 18-unit project takes approximately twice as much effort to complete as the 12-unit project. Please check one of the following:

☐ 12-unit

☐ 18-unit
