

Software Features

- **Auto-Configuration**
DHCP configures your network automatically.
- **Rescue System**
Disk-On-Chip(DOC) can reboot the system in the unlikely event of a system crash.
- **Email Service**
Scheduled mail retrieval and management with support for SMTP and POP3 clients.
- **Web server**
Web hosting and modification with support for MS Frontpage extensions. Cache frequently accessed pages to reduce traffic and enhance network performance.
- **Online Software Upgrade**
Remotely upgrade software services via Internet to keep up with leading technology.
- **Network Resource Sharing**
Share files on your network.
- **Network Address Translation (NAT)**
Use a single IP address for the entire network and mask clients on the network from the Internet.
- **Cross-Platform Support**
Exchange information effortlessly between Windows, Unix and Linux clients.
- **Multilingual User Interface**
Switch menus between English, Simplified Chinese, Traditional Chinese fonts.
- **RAID-1 Mirroring**
Protect critical data in the event of hard drive failure through redundancy over two drives.
- **DNS**
Easy management of your domain name settings

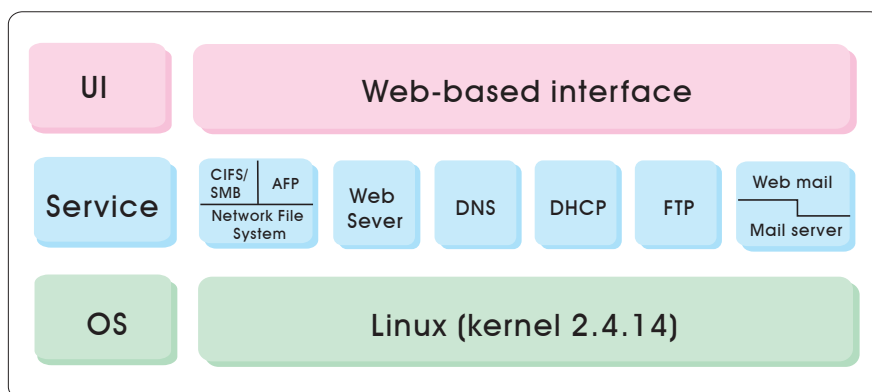

Hardware Specifications

- **Processor:**
Pentium III & Celeron up to 933MHz
- **Chipset:**
Intel 810e
- **Disk-On-Chip:**
8MB Flash ROM with embedded Linux OS
- **Memory:**
128MB SDRAM (PC133) up to 512MB
- **Storage:**
Standard 20GB HDD
(option RAID-1 mirroring with second HDD)
- **Network Interface:**
Dual 10/100 Base-T Ethernet
- **Display:**
LCD Panel
- **I/O Ports:**
9-pin serial port, 25-pin parallel port
- **Connections:**
DSL, Cable modem, Dial-up (internal 56k v.90)
- **Dimensions:**
12.0x3.5x15.75 inches
- **Power Requirements:**
100-240V, 50/60Hz
- **Power Consumption:** 150 W
- **Weight:** 13.0 lbs (with one HDD)
- **LEDs:** Power, HDD Activity
- **EMI:** FCC Class B, CE, TUV
- **Safety:** FCC Class B, CE, TUV

- **MRTG (Multi Router Traffic Grapher)**
Analyze your network resources for optimized performance.
- **Web mail**
Users can easily manage email themselves through web browser by web-based interface.
- **Security**
VPN and SSL encryption provide secure transmissions over the Internet.
