

HUMAN HAMSTER HYBRIDS

PARTY APPROVED POP PUNK WITH BRASS AND SKA

[band]

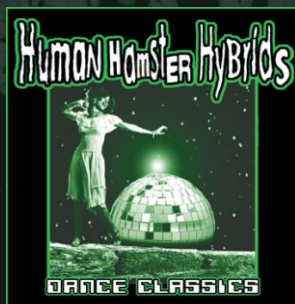

[hamster-punk]

Like it or not - we know our chords. For the past five years we've been playing around with punk rock, pop and ska sounds, turning them into melody, speed, and sometimes into a real guitar blast - in other words catchy tunes and songs that kick butt. Ok, if you listen closely you'll notice we've even learned a few additional chords, but this can happen to the greatest of musicians. And if we set our sights on a real pop icon, we will cover it fearlessly. That's the way it goes in pop punk. George Michael and Kim Wilde will thank us for it!

Hardly unnoticed two additional Hamsters have joined the band, as our brass section they're turning up the heat. Definitely something that's not to be missed. And this brings us to our live acts, dear friends of polka music. Our tours through Southern Germany have not only provided us with all sorts of pleasurable backstage events, but have also brought us together with other great bands like Edna's Goldfish, Skin Of Tears, Rantanplan, or The Swoons. Especially when playing live we favour an all-inclusive approach: from dance clubs to support acts at beer festivals we've played every kind of event and got the audience shakin' and movin'. Sometimes punk even works in the beer tent - on our homepage you can see how!

Greetings from the Human Hamster Hybrids

[album]

Out now:

the new Hamster long player **"DANCE CLASSICS"**!
A refined selection of 12 high-end punk rock songs
in brilliant studio quality. No kidding!
